

e-Learningonline™

FSA Training & Competence

System Requirements

The minimum recommended specification required for a PC to run the Software: Pentium 3 Processor 1GHz, 512MB RAM, Windows 2000 or better, Internet Explorer 6, Broadband Internet Access

In Summary

Ongoing FSA Training is a absolute necessity if you want to sell and advise on insurance products within your business. But training can be expensive - not only in monetary terms, but also in lost productivity. Our Online FSA Training and Competency modules allow your FSA training to be done at your own premises, on demand whenever you need it!

We have worked closely with leading training organisations and compliance experts to bring you a full suite of FSA modules, which will enable you to keep your staff to keep fully up to date on the ever changing face of FSA Compliance regulation.

e-learningonline™ is a web based program that allows you to use the web as a learning tool, to train your staff and personnel on all aspects of the FSA regulations.

Its simplistic design allows a system administrator or supervisor within your organisation, to enrol delegates and then monitor their activity and results through a sophisticated yet simple, set of reports, allowing you to, efficiently and cost effectively train and monitor hundreds or even thousands of staff at a fraction of the cost of conventional classroom seminars.

Key Features of e-learningonline™

- Easy User Registration And Access
- Courses Written In Modular Format
- Revision Tests To Assist Learning
- Final Exam Checks Delegate Knowledge
- Automatic Renewals
- Full Management Reporting
- Full Training And Support

In Brief Our FSA Modules Cover:

- Who The FSA Are
- ICOBS & The Compliance Process
- Contract Law & Insurance
- Product Knowledge (Bespoke to Your Product Range)
- Money Laundering
- Treating Customers Fairly

Easy User Registration & Access

Being web based, e-learningonline™ allows users to access it whenever and wherever they want; at home or at the office the choice is theirs.

The Web address can be tailored to any you wish, or be a hyperlink from your existing website, with the system 'skinned' to your corporate ID.

The e-learningonline™ user interface has been designed to make using e-learningonline™ simple, quick and straightforward.

The system allows a supervisor to be appointed within your organisation to oversee the delegate's enrolment and monitor their FSA learning activity. Once a user gets his/her unique ID and login, they're ready to go!

Course Written In Modular Format For Easy Learning

The FSA Course is broken down into modules, with modules again broken into sections. This allows users to break down their distance learning into manageable bite sized chunks.

Revision Tests to Assist Learning

Revision is an essential part of distance learning. e-learningonline™ allows delegates to check out what they know at the end of each module or section.

Delegates can visit any module or section as often as they like, and take as many revision tests as they wish.

Tests are randomised, with the questions changing each time the delegate takes a new test! At the end of each revision session, the questions they answered incorrectly are highlighted, and the delegate is pointed back

to the relevant content page to again assist the learning process.

Final Exam Checks Delegate Knowledge

At the end of the course, as and when the delegate feels ready, a final exam checks the delegate's FSA knowledge. All questions are multiple choice and are randomised which means that anyone who retakes the exam will get a different set of questions each time.

Delegates can monitor their own progress through their learning experience, which culminates in them passing their exam and printing off their certificate online.

Automatic Renewals

The FSA competency exam needs to be taken annually. In order to help you supervise this process, e-learningonline™ manages this automatically for you by emailing both delegate and supervisor ahead of the expiry of the certification. Detailed reports enable supervisors to monitor their staff's competence on an ongoing basis, in order to ensure that delegates retake or sit new exams every year.

Full Management Reporting

e-learningonline™ provides a full suite of reports that allows supervisors and management to monitor every aspect of the FSA learning activity.

How often delegates have visited each module, how they are progressing, along with exam scores etc., are all available at the touch of a button.

Delegate CV's and other key personnel information are also kept in an easy access reference library.

Full Training & Support

We provide full product training and support for the e-learningonline™ system. Setting up e-learningonline™ couldn't be easier, with full on-site training available, with all relevant personnel fully trained in both the setting up, and use of the system.

Ongoing support from our help desk is only ever a phone call away, ensuring that any problems, questions or queries are handled quickly and solved in the shortest possible time. We pride ourselves on our service and back up and the reliability of our entire product range.

E-Learning is good for the Environment!

Recent research* has shown that e-learning uses up to 90% less energy per delegate and produces up to 85% less CO2 emissions per delegate when compared to conventional classroom based training.

(* Open University Design Innovation Group, March 2005)

e-learningonline™ not only provides a cutting edge online learning platform with a powerful supervision module and reports suite, but also combines a dynamic easy to use rapid authoring and content management tool, that allows training to be distributed on any subject with the minimal of cost, and at the same time helps us all do our bit to save the planet!
