

e-Learningonline™ Business Edition

System Requirements

The minimum recommended specification required for a PC to run the Software: Pentium 3 Processor 1GHz, 512MB RAM, Windows 2000 or better, Internet Explorer 6, Broadband Internet Access

In Summary

Quality training leads to quality staff, but training can be expensive - not only in monetary terms, but also in lost productivity. Wouldn't it be much simpler if your training could be done at your own premises, in your own time? Our e-learningonline™ package provides this facility, and more!

e-learningonline™ is a web based program that allows businesses and organisations to use the web as a learning tool, to train staff and personnel on their chosen subject matter.

The number of uses of e-learningonline™ is unlimited, as courses can be easily configured to teach and test on virtually any subject. Its simplistic design allows a system administrator within any organisation to decide on the subject, write in the content, set test questions and pass marks, and monitor delegate activity and results through a sophisticated yet simple, set of reports.

Whether it's Sales Training, Health and Safety, a new product launch or new starters induction, e-learningonline™ allows organisations to efficiently and cost effectively train and monitor hundreds or even thousands of staff at a fraction of the cost of conventional classroom seminars.

Our alliance with a number of industry leading training and consultancy organisations, allows us to assist those who need help with writing a training program.

Take control of your training now!

Turn your Service Department into a Sales Department now!

Key Features

- Easy User Registration And Access
- Courses Written In Modular Format On Any subject
- Revision Tests To Aid Learning
- Final Exam Checks Delegate Knowledge
- Automatic Renewals
- Full Management Reporting
- Full Training And Support

Easy User Registration & Access

Being web based, e-learningonline™ allows users to access it when and wherever they want; at home or at the office the choice is theirs.

The e-learningonline™ user interface has been designed to make using e-learningonline™ simple, quick and straightforward.

The system allows a supervisor to be appointed within your organisation to oversee the delegate's enrolment and course content (you can of course let us take care of everything!). Each user gets a unique ID and login. Once this has been done it's ready to go! e-learningonline™ allows the user to monitor every time he/she logs on, a facility which also is useful to management to monitor each delegate's progress.

Courses Written In Modular Format On Any Subject

Courses can be broken down into as many modules as you wish, with modules again broken into sections. This allows users to break down their distance learning into manageable bite sized chunks.

Courses can be written on any subject. Once the course content and questions have been decided, the course administrator can simply access the administration maintenance section on-line, and either type in the content and questions using a familiar Word-like editor, or import the content from any standard word-processing package. Once this is done, you're ready to go.

The web address can be tailored to any you wish, or as a hyperlink from your existing website. The system can be 'skinned' to your corporate ID. e-learningonline™ is totally flexible and puts you in control.

Revision Tests to Aid Learning

Revision is an essential part of distance learning. e-learningonline™ allows delegates to check out what they know at the end of each module or section.

Delegates can visit any module or section as often as they like, and take as many revision tests as they wish.

Tests are randomised, with the questions changing each time the delegate takes a new test! At the end of each revision session, the questions they answered incorrectly are highlighted, and the delegate is pointed back to the relevant content to again assist the learning process.

Final Exam Checks Delegate Knowledge

At the end of the course, a final exam checks the delegate's knowledge. Questions are multiple choice; you decide on the questions and how many there are. Pass marks can be set at any level you wish.

All questions are randomised which means that a delegate who retakes the exam will get a different set of questions each time.

The randomisation process ensures a robust method of testing. Delegates can monitor their own progress throughout their learning experience, which culminates in them passing their exam and printing their certificate online - which can of course, be tailored to your exact requirements.

Automatic Renewals

For those who want delegates to regularly update their distance learning, e-learningonline™ also manages this automatically.

For example, e-learningonline™ is used widely within the motor and insurance industries to teach FSA competence and compliance as a regulation for the sale of insurance products.

e-learningonline™ ensures that staff's FSA competence is always up-to-date by emailing both delegate and supervisor ahead of the expiry of the certification. Detailed reports enable managers to monitor their staff's competence on an ongoing basis, in order to ensure that delegates retake or sit new exams every year.

Full Management Reporting

e-learningonline™ provides a full suite of reporting that allows management to monitor all aspects of the distance learning process.

How often delegates have visited each program; how they are progressing and exam scores are all available at the touch of a button.

Delegate CV's and other key personnel information are kept as an easy access reference library.

Full Training & Support

We provide full product training and support for the e-learningonline™ system. Setting up e-learningonline™ couldn't be easier, with full on-site training coming as a standard part of the e-learningonline™ package, with all relevant personnel fully trained in both the setting up, and use of the system.

Ongoing support from our help desk is only ever a phone call away, ensuring that any problems, questions or queries are handled quickly and solved in the shortest possible time. We pride ourselves on our service and back up and the reliability of our systems.

E-Learning is good for the Environment!

Recent research* has shown that e-learning uses up to 90% less energy per delegate and produces up to 85% less CO2 emissions per delegate when compared to conventional classroom based training.

(* Open University Design Innovation Group, March 2005)

e-learningonline™ not only provides a cutting edge online learning platform with a powerful supervision module and reports suite, but also combines a dynamic easy to use rapid authoring and content management tool, that allows training to be distributed on any subject with the minimal of cost, and at the same time helps us all do our bit to save the planet!
