

E-learningonline™ is a web based rapid authoring Learning Management System that allows businesses and organisations to self author & publish their own courses online quickly and easily

## In Summary

- The number of uses of E-learningonline™ is unlimited, as courses can be easily configured to teach and test on virtually any subject matter
- Its simplistic design allows a system administrator within any organisation to decide on the subject, write in the content, set test questions and pass marks, and monitor delegate activity and results through a sophisticated yet simple, set of reports
- Whether it's Sales Training, Health & Safety, a new product launch or new starters induction, E-learningonline™ allows you to efficiently and cost effectively train and monitor hundreds or even thousands of staff at a fraction of the cost of conventional classroom seminars
- Being web based, E-learningonline™ allows users to access it when and wherever they want; at home or at the office the choice is theirs
- Our alliance with a number of industry leading training and consultancy organisations, allows us to assist those who need help with writing a training program

## Key Features

- Easy user registration and access
- Courses easily written in modular format on any subject
- No special IT skills required
- Revision tests to aid learning
- Final exam checks delegate knowledge
- Online certification
- Automated email reminders
- Automatic renewals
- Full management reporting
- Full classroom, online training and support

For a full no obligation demonstration or to simply talk through your training requirements, call us now on 0871 989 9859 or email us at [info@fisconline.co.uk](mailto:info@fisconline.co.uk)

## Easy User Registration & Access

- The E-learningonline™ user interface has been designed to make the user experience simple, quick and straightforward
- The system allows a supervisor to be appointed within an organisation to oversee the delegate's enrolment and course content (you can of course let us take care of everything!)
- Each user gets a unique ID and login. Once this has been done it's ready to go! E-learningonline™ allows the user to monitor every time he/she logs on, a facility which also is useful for management to monitor each delegate's progress

## Courses Written In Modular Format On Any Subject

- Courses can be broken down into as many modules as you wish, with modules again broken into sections, allowing the learning content to be studied in manageable bite sized chunks
- Courses can be written on any subject
- Once the course content and questions have been decided, the course administrator can simply access the administration maintenance section on-line, and either type in the content and questions using a familiar Word-like editor, or import the content from any standard word-processing package
- The web address can be tailored to any you wish, or as a hyperlink from your existing website. The system can be 'skinned' to your corporate ID. E-learningonline™ is totally flexible and puts you in control

## Revision Tests to Aid Learning

- Revision is an essential part of distance learning. E-learningonline™ allows delegates to check out what they know at the end of each module or section
- Delegates can visit any module or section as often as they like, and take as many revision tests as they wish
- Tests are randomised, with questions changing each time the delegate takes a new test! At the end of each revision session, the questions answered incorrectly are highlighted, and the delegate is pointed back to the relevant content to again assist the learning process

## Final Exam Checks Delegate Knowledge

- At the end of the course, a final exam checks the delegate's knowledge. Questions are multiple choice; you decide on the questions and how many there are. Pass marks can be set at any level you wish
- All questions are randomised which means that a delegate who retakes the exam will get a different set of questions each time
- The system can hold an unlimited amount of courses, each can be separately certificated or linked to each other
